

AMENDMENTS TO THE CLAIMS

Please cancel claims 1-6.

Claims 1-6 (Cancelled).

Please add the following new claims:

Claim 7 (New):

A device for sensing air condition comprising:

a humidity sensing mechanism for sensing saturated relative humidity;

a first indicating mechanism;

a second indicating mechanism;

said humidity sensing mechanism communicative with said first and second indicating mechanisms;

said humidity sensing mechanism controlling said first indicating mechanism to illuminate when said humidity sensing mechanism detects saturated relative humidity levels below a predetermined unsafe level of saturated relative humidity;

said humidity sensing mechanism controlling said second indicating mechanism to illuminate when said humidity sensing mechanism detects saturated relative humidity levels above said a predetermined unsafe level of saturated relative humidity.
